Save on Your Energy Bills, Save the Environment

Energy-efficient windows can help save a bundle and by selecting and using products that reduce energy consumption, you can lessen your environmental footprint, limiting usage of fossil fuels and lowering carbon emissions.

Save With ENERGY STAR®

Lower your energy bills and save money by installing windows with the ENERGY STAR Qualification. Solar Pro Windows are ENERGY STAR Qualified for your region of the country.

State	Potential Annual Savings
New Mexico	\$381
Texas, Oklahoma, Arkansas, Louisiana	\$352
Kansas, Missouri	\$266
Tennessee, Mississippi, Alabama	\$349

Source: ENERGY STAR 2009. For Savings Methodology, visit www.energystar.gov/windows_methodology. Savings estimates are based on energy calculations performed by Lawrence Berkeley National Laboratory (LBNL) using RESFEN 5.0 for typical homes in 96 U.S. cities.

Just Stay Cool

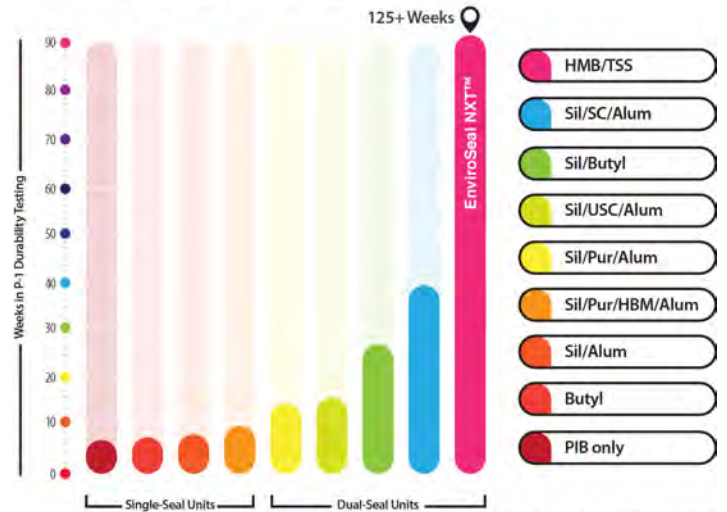

We all know that added plastic tint films designed to keep the heat out of a home are known for bubbling, peeling and otherwise obscuring your view - not to mention most of the time they become more of an eyesore. Solar Pro Windows with our standard or plus glass package will greatly reduce the heat from the outside, when the heat is at its peak.

Solar Pro Glass Takes the Heat in Stride

When you choose Solar Pro Windows, the temperature in your home will stay more consistent keeping you from encountering those multiple temperature swings experienced with old, inefficient windows. Depending on the package you choose, Solar Pro Glass is composed of two or three layers of specially formulated glass which diffuse the heat keeping your home comfortable - no matter how hot it gets outside.

Enjoy the State-of-the-Art UV Protection

Every homeowner should consider protecting their furnishings when looking to purchase windows for their home. Why let your expensive carpets, curtains and fine furniture get washed out by the sun's harsh rays? Not to worry with Solar Pro Windows with Low-E glass, because they will provide you with exceptional UV protection - reducing up to 95% of damaging ultraviolet rays and keeping your furnishings like new.

Healthy Indoor Air Quality - The Super Way

If you or your loved ones have allergies or complications related to poor air quality, you'll experience increased comfort with Solar Pro Windows. The Solar Pro glass system's dual seal spacer by Super Spacer® helps keep condensation out, unlike metal spacer systems ensuring better air quality.

Performance Options

Experience the New Standard in High Performance Glass Systems

Solar Pro Window Systems boast a Low-E glass system like no other. Our Low-E cubed glass is the ultimate residential performance glass. Our glass systems are designed to deliver a balance of solar control and a high level of visibility through the glass. With our unique attribute, a triple layer of silver on the glass, this feature elevates our glass options well beyond ordinary Low-E glass.

Performance Comparison Typical Glass Packages

	U-Value - Air/Argon	SHGC	VT	UV
Single pane clear	1.04/N/A	0.86	90%	.71
Double pane clear	0.48/N/A	0.76	81%	.56
Ordinary Low E	0.35/.31	0.72	75%	.44
Solar Pro	NA/.29*	0.21	50%	.05
Solar Pro Plus	NA/.22*	0.19	36%	.05

Double Hung Windows

Solar Pro Double Hung Windows give you the feel of hand crafted windows without the upkeep. You'll enjoy the ease of operation and experience easy tilt in function for cleaning. Solar Pro Double Hung Windows are designed to keep you comfortable and your view clear.

- Fusion welded frame corners at 45 degrees minimizes air and water infiltration.
- High performance cam action locks for ease of use and secure performance.
- Ventilation night latches allow the enjoyment of a cool evening breeze.
- Full aluminum reinforced meeting rails for added strength.
- Constant force balance system for years of worry free operation.
- Durable Extruded aluminum screen frame for screens that last longer.
- Dual Glaze 7/8" overall IG using double strength glass for maximum SHGC and UV protection - standard.

Double Hung Features:

- A. Fusion welded at 45 degrees eliminating air and water penetration
- B. Full aluminum reinforced meeting rails for maximum strength
- C. Dual Glaze using high performance LowE, double strength glass for maximum SHGC and UV protection
- D. Dual FinSil weatherstripping

Additional Options:

- Optional insulated frame for maximum insulating value, 7.14 R-value per inch.
- Optional triple glaze for enhanced efficiency.

Choose Your New Window Performance Level

Double Hung Glass Package	Solar Pro Plus	Solar Pro
U-Factor	0.24	0.30
Solar Heat Gain Coefficient	0.18	0.20

The lower the number, the better the insulating performance. Additional options could impact listed performance ratings.

Single Hung Windows

Solar Pro Single Hung Windows offer the reliability you've come to expect coupled with surprising affordability. Our windows work for any style of home from traditional to modern and can include colonial grids to give an extra boost to your curb appeal.

- Constant force balance system for years of worry free operation.
- Dual Glaze 7/8" overall IG using double strength glass for maximum SHGC and UV protection - standard.
- Fusion welded frame corners at 45 degrees minimizes air and water infiltration.
- High performance cam action locks for ease of use and secure performance.
- Ventilation night latches allow the enjoyment of a cool breeze.
- Full aluminum reinforced meeting rails for added strength.
- 3 1/4" Mainframe for additional strength and durability.

Tiered step design on the interior frame adds beauty and style that will enhance the look of any room.

Single Hung Features:

- A. Fusion welded at 45 degrees eliminating air and water penetration
- B. Full aluminum reinforced meeting rails for maximum strength
- C. Dual Glaze using high performance LowE, double strength glass for maximum SHGC and UV protection
- D. Dual FinSil weatherstripping

Additional Options:
